## DETAILED ACTION

### *Drawings*

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the

- First portion of the hopper
- Second portion of the hopper

must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Examiner notes that the hopper (3) is shown in the drawings, but the portions of the hopper which perform supporting functions described in the independent claims are not disclosed in the drawings or specification.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted

Art Unit: 3653

by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claims 1, 8, 9 and 10 contain the limitation of:

“wherein the hopper comprises a first portion that supports the plurality of sheets of paper in a stacking direction of the plurality of sheets of paper; and a second portion that supports the plurality of sheets of paper in a non-stacking direction of the plurality of sheets of paper.”

This is indefinite language.

- Applicant has not to defined “the stacking direction of the plurality of sheets of paper”
- Similarly, applicant has not to defined “the non-stacking direction of the plurality of sheets of paper”

Applicant has mentioned, in the summary of invention section, that the stacking plane of the hopper is parallel with a tangent plane of the paper feeding roller (page 6, lines 23+).

However, this does not cure the indefiniteness of the claims, since a roller, such as the paper feeding roller, has infinite tangent planes. Further, the stacking plane of the hopper is not necessarily the stacking direction of the plurality of sheets.

Art Unit: 3653

Claim 4 is indefinite because as described above, a roller, such as the paper feeding roller, has infinite tangent planes.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
